BUDDED PECAN TREES
PECAN GROVE FARM NURSERY and ORCHARD
J. B. WIGHT, PROPRIETOR
CAIRO, GEORGIA

A Tree with a Record. Ask for It.

PRICE LIST
SEASON 1918-1919
THIRTY-ONE years' experience with the pecan has convinced me more and more of its profitableness. The demand for the best nuts is constantly increasing. Trees from fifteen to two hundred years old are annually producing their crops of nuts to the delight both of the palate and pocketbooks of their owners. A grove once established, a pound of pecans can be grown more cheaply than a pound of cotton; and the grower has twelve months of the year in which to sell them, and the world for his market.

But if success is to come to the pecan grower, there are certain precautions that must be observed: (1) Strong and vigorous budded trees should be set of such varieties as are adapted to the section where they are to be grown. Avoid stunted trees, for a runt in the nursery will remain a dwarf in the grove. (2) Set trees only on the best land. (3) Cultivate, fertilize and care for them in the best manner. These are the three most important requisites to successful pecan growing either on a small or large scale. Observe them and you will not be disappointed.

SOME FACTS ABOUT MY TREES

Great care is taken to send out only strong and vigorous trees, which are true to name.

My scions are taken from my own trees, which may be seen growing and fruiting in my groves.

Only strong and vigorous stocks are used for propagating purposes.

I have no agents but my bearing trees, my nursery stock, and my former customers. They speak for themselves.

A cordial invitation is extended to visit my nursery and orchard of 225 acres located near Cairo. To see is to learn.

Cash should accompany all orders, or satisfactory references be given.
BUDDED PECAN TREES, SEASON OF 1918-1919

No trees held later than December 15th, unless twenty-five per cent of the price is paid before that date. This is necessary as an evidence of good faith.

All orders are accepted subject to weather and other conditions beyond my control.

My experience is at the command of those who wish advice as to the best varieties to set in any particular section.

"Anybody can cut prices, but it takes brains to make a better article." This applies to pecan trees; and I supply the better article.

The prices given below are for strong, well-rooted trees, carefully packed and delivered to the express or railroad company at Cairo. But express or freight will be prepaid on cash with order for twenty-five or more trees shipped at one time to one person at the following prices:

<table>
<thead>
<tr>
<th>VARIETIES</th>
</tr>
</thead>
<tbody>
<tr>
<td>Stuart is an old favorite that has been widely tested. This is a safe variety to plant and succeeds over a wider territory than probably any other variety.</td>
</tr>
<tr>
<td>Schley is placed by some at the head of the list. It is a large, thin-shelled nut of fine flavor, and is well filled with meat.</td>
</tr>
</tbody>
</table>
BUDDED PECAN TREES, SEASON OF 1918-1919

Frotscher is a large, thin-shelled nut, which has been widely planted.

Van Deman has also been extensively disseminated, and with many growers it stands at or near the head of the list.

Success is a nut of fine flavor. Originating in Mississippi, it has been widely disseminated during the last few years.

Delmas is a large nut and a very early and prolific bearer.

Pabst is a safe nut; and while not quite so large as some of the above, yet it is a good bearer, and one can hardly make a mistake in setting it.

Nelson is another candidate for favor. The nut is very large. It is a strong, vigorous grower, and an early and prolific bearer.

Moneymaker is growing in favor. It is an early bearer, prolific, healthy and in every way is promising.

Can also furnish Moore, Waukeenah, Mobile, Curtis, Alley and President in limited quantities.

If in doubt as to the best varieties to set, this, when left to me, will receive my most careful attention, thus insuring a better selection than an inexperienced grower could make for himself.

The transplanting season extends from the latter part of November to the early part of the following March. Other things, however, being equal the earlier in the season trees are set the better and more promptly they grow off the following season.

I have a few "Rush" English walnuts budded on black walnut stock. These are promising. Price $1.00 each.
